August 10, 2004

Dear Members of the Round Table and the First Nations Council,

Attached are the more important final changes to the recommendations, which I promised I would send to you for final comment. Also re-attached for your review is the final chapter (7.0) of the report on the conclusions and path forward. Please forward your comments to me by **no later than August 17**. I will then re-incorporate minor variations but check with all of you again if a major change that alters the meaning of the text is proposed. If there are no changes, we will go to final edit and print!

Congratulations to all of you who worked so hard to develop this consensus. Your secretariat is as proud as punch to have served you in this process!

Cheers,

Peter André Globensky
Executive Coordinator

Draft Status Report

Final Changes to Recommendations & Chapter 7.0

The changes brought in the recommendations are highlighted in bold

5.1.3

That the Minister of Conservation actively explore the possibility of creating a **resources partnership** with other provincial departments, the federal government, East Side First Nations, the private sector, public agencies and environmental non-governmental organizations **in order to generate a pool of funds and other resources** to permit the on-going development of a comprehensive Broad Area Plan.

5.1.5

That the East Side First Nations Council be provided with a renewed mandate:

- To continue to facilitate and support negotiations and consultations on Protocols of Agreement with the First Nations governments.
- To continue to facilitate and support negotiations and consultations on a Protocol of Agreement with the Métis Nation resident on the East Side of Lake Winnipeg.
- To continue to provide and collect information, consider and analyze community and individual submissions, engage in discussions and prepare the final recommendations for the Broad Area Plan for the East Side of Lake Winnipeg pursuant to the mandate initially provided by the Minister;
